Education

Pandit Deendayal Energy University (PDEU) **July 2023 – May 2027**
B.Tech. in Information and Communication Technology | CGPA: 7.78/10 *Gandhinagar, Gujarat*
CS Fundamentals: Data Structures and Algorithms, OOP, DBMS, Operating System, Computer Networks, Distributed System

Technical Skills

Programming Languages: Java, Python, JavaScript, C, SQL
Backend and Web: React.js, Node.js, Express.js, REST API, FastAPI, Microservices, Redis, Kafka, Git/Github, Postman
Databases: PostgreSQL, MongoDB, MySQL
Cloud and DevOps: AWS (EC2, S3, EKS, IAM, Lambda), Docker, Kubernetes, Terraform, Jenkins, CI/CD, Argo CD, Linux
AI and LLM: RAG, LangChain, Pinecone, LLM, NLP, MCP, Semantic Search

Experience

Full Stack Developer Intern **May 2026 – June 2026**
iTech Brains *Ahmedabad, India*

- Architected an e-commerce platform using **7 independent Node.js microservices**, each containerized with **Docker** and backed by a dedicated PostgreSQL instance, communicating through REST APIs.
- Designed an **event-driven order pipeline** using **Apache Kafka**, enabling inventory, payment, and notification services to process events asynchronously and reducing inter-service bottlenecks.
- Built a **REST API Gateway with JWT authentication** and load-tested the backend under **300 concurrent users**, validating request handling and reliability across all **7 microservices**.

Software Development Engineer Intern **February 2026 – April 2026**
InstaPrepAI *Mumbai, India*

- Reduced backend and AI chatbot response time by roughly **40%** (from 4–5s to 2–3s) by redesigning the semantic retrieval pipeline with **Pinecone metadata filtering** to narrow candidates before vector search.
- Built a **live leaderboard service** for **3 categories** with **4 backend APIs**, deduplication, ranking logic, and reliable data handling, eliminating manual winner updates.
- Investigated performance bottlenecks using **CloudWatch** logs and metrics and fixed **IAM** policies across **EC2, S3, and Lambda** to resolve recurring permission failures.

Projects

NyaySaar – AI Court Order Summarization GitHub
Tech stack: React, FastAPI, PostgreSQL, LangChain, Pinecone

- Developed a **RAG-based document intelligence system** that converts **100+ page** court orders into a reusable knowledge base and retrieves relevant sections for each query.
- Reduced legal-document analysis time from **2–4 hours to 10–30 minutes** (**75–85%**) by implementing a modular pipeline using semantic retrieval on **Pinecone** with **LangChain** for orchestration, enabling independent scaling.
- Developed and maintained backend services with **FastAPI REST endpoints** for upload, summarization, and Q&A, separating transactional data from semantic search with a **React** frontend.

End-to-End DevSecOps Pipeline GitHub
Tech stack: Jenkins, Docker, Kubernetes, AWS EKS, Terraform, Argo CD

- Automated the SDLC with an **11-stage Jenkins CI/CD pipeline** and **4 security checks**, including **GitLeaks, SonarQube, Trivy, and OWASP** that block vulnerable builds before deployment.
- Replaced **7+ manual deployment steps** with a single git push using **Argo CD GitOps**, adding full traceability and one-step rollback.
- Provisioned scalable AWS cloud infrastructure with **modular Terraform** and deployed containerized, replicated **Kubernetes (EKS)** workloads across **2 availability zones** for high availability and rolling updates.

Achievements / Participations / Leadership Roles

- **Competitive Programming:** Solved 300+ DSA problems across multiple coding platforms, primarily using Java.
- **Adobe India Hackathon:** Advanced to national-level Round 2, among 26,000+ shortlisted participants from 200,000+ registrations.
- **Google Gemini India Hackathon:** Placed in the top 5 of 150 teams in PDEU's internal round.
- **Vice Chair, IEEE Computer Society SBC (PDEU):** Led a 40+ member technical chapter and organized 8+ events, workshops, and hackathons for 200+ students.
- **Campus Ambassador, Cisco (PDEU):** Promoted Cisco technical programs and coordinated on-campus outreach.
