

Rishabh Nandekar

Ahmedabad, Gujarat, India

+91 8878535377 | rishabhnandekar380@gmail.com | LinkedIn | GitHub | LeetCode

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C

Frameworks & Libraries: React, Node, Express, FastAPI, REST API, LangChain

AI & LLM: RAG Pipelines, LangChain, Prompt Engineering, Vector DB (Pinecone), LLMnbased Retrieval Systems

Databases: PostgreSQL, MongoDB, MySQL

Cloud & DevOps: AWS (EC2, S3, EKS, IAM, Lambda, CloudWatch), Docker, Kubernetes, Terraform, Jenkins, CI/CD

Tools & Core CS: Git, Postman, Linux, Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Full Stack Developer Intern

May 2026 – Jun 2026

iTech Brains

Ahmedabad

- Built and deployed a **MERN based e commerce platform** spanning **10+ responsive pages**, integrating **10+ REST APIs** across authentication, product management, categories, reviews, and cart workflows, secured with **JWT authentication**, server-side validation, and protected routes
- Collaborated in an **Agile/Gitbased workflow**, developing, testing, and debugging features through review cycles to ship production-ready releases, closing gaps in unauthorized access across login and product-management flows

Software Developer Engineer Intern

Feb 2026 – Apr 2026

InstaPrepAI

Mumbai (Remote)

- Redesigned the semantic retrieval pipeline for an AI chatbot serving a large knowledge base, using **Pinecone metadata filters** to narrow candidates before running vector search, reducing response time from **~4-5s** to **~2-3s (~45% faster)**
- Eliminated manual winner updates on the Rewards page by building a **live leaderboard system** across **3 categories**, integrating **4 backend APIs** with deduplication and top 3 filtering logic
- Traced backend performance bottlenecks via **CloudWatch** log analysis and tightened **IAM** access policies across EC2/S3 infrastructure, improving deployment reliability

PROJECTS

End to End Devsecops Pipeline | Jenkins, Kubernetes, AWS EKS, Terraform, Docker, Argo CD

GitHub

- Architected a **GitOps driven CI/CD pipeline** where a manual release would typically require **7+ steps** reduced to a single **git push**, cutting manual release effort by an estimated **~70-80%**, with every deployment recorded as a Git commit for full audit trail and instant rollback
- Enforced **3 automated security checks** across an **11 stage CI pipeline**, blocking vulnerable builds before they reach production
- Provisioned highly available AWS infrastructure via **3 modular Terraform components**, deploying across **3 availability zones** with **3 replica Kubernetes workloads** for fault tolerance and zero downtime rolling updates

Court Order Summarization Tool | React, FastAPI, LangChain, Pinecone

GitHub

- Designed a **retrieval-first AI architecture** that transforms uploaded court orders into a reusable knowledge base, embedding and indexing documents once, then retrieving only relevant chunks per query instead of reprocessing full **100+ page** documents on every question
- Engineered a **modular document processing pipeline**, cutting legal-document analysis time by **70-80%** while enabling independent scaling of each processing stage
- Separated structured application data from semantic document representations by combining **relational storage** with **vector indexing**, enabling efficient transactional operations alongside low-latency semantic retrieval

EDUCATION

Pandit Deendayal Energy University (PDEU)

2023 – 2027

B.Tech. in Information and Communication Technology

Gandhinagar, Gujarat

ACHIEVEMENTS

- **Vice Chair, IEEE Computer Society SBC (PDEU):** Led and scaled a 40+ member chapter, organizing 8+ technical events and hackathons for 200+ students
- **General Secretary, VGA Filmmaking Club (PDEU):** Directed planning and execution of 5+ filmmaking and cultural events across cross-functional teams
- **Google India Tech Summit Innovate Hackathon:** Selected among PDEU's top teams to advance to the National Level, backed by the Google Student Ambassador Community
